

Washable Roll: (WR)

General

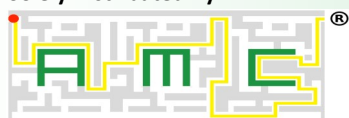

Washable Roll (WR) is one of the most commonly used filters for coarse particles in the whole series of filtration products. It is easy to manage, light in weight, re-usable, flexible in size and for easy replacement. WR serves as the pre-stage of filtration and usually goes together with aluminium or galvanised steel frame.

Standard Specifications

- Polyester Media
- Comes in thickness of 3mm, 10mm, 15mm, 20mm, 25mm
- Standard Width x Length: 2m x 20m
- International shipping packaging
- Comes in 3 different efficiencies (G2, G3, G4) of your choice
- Available in roll that comes with impregnated carbon
- Available in all kinds of custom-made sizes
- Complied with EN779 and ASHRAE 52.2 Test Standards

Model	Efficiency	Width x Length	Thickness	Media/ Colour	Grammage
WRW03090	G2	2m x 20m	3mm	Polyester/ White	90 g/m2
WRW10150	G2	2m x 20m	10mm	Polyester/ White	150 g/m2
