Washable Roll: Washable Polyester Media (WPM)

General

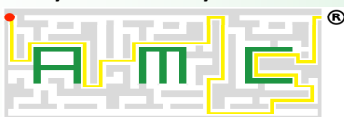

WPM is one of the most commonly used filter for coarse particles in the whole series of filtration products. It is easy to manage, light in weight, re-usable, flexible in size and for easy replacement. WPM serves as the pre-stage of filtration and usually goes together with aluminium or galvanised steel frame.

Standard Specifications

- Polyester Media
- Comes in thickness of 3mm, 10mm, 15mm, 20mm, 25mm
- Standard Width x Length: 2m x 20m
- International shipping packaging
- Comes in 3 different efficiencies (G2, G3, G4) of your choice
- Available in roll that comes with impregnated carbon
- Complied with EN779 and ASHRAE 52.2 Test Standards

Model	Efficiency	Width x Length	Thickness	Media/ Colour	Grammage
WPM-3	G2	2m x 20m	3mm	Polyester/ White	90 g/m ²
WPM-10	G3	2m x 20m	10mm	Polyester/ White	125 g/m ²
WPM-14	G3	2m x 20m	14mm	Polyester/ White	140 g/m ²
WPM-20A	G3	2m x 20m	20mm	Polyester/ White	265 g/m ²
WPM-20B	G4	2m x 20m	20mm	Polyester/ White	315 g/m ²
WPM-25	G4	2m x 20m	25mm	Polyester/ White	350 g/m ²
WPMBW-290	G3	2m x 20m	20mm	Polyester/ White & Blue	225 g/m ²
WPCB-3	G2	1m x 20m	3mm	Carbon Polyester/Black	145 g/m ²
WPCB-10	G3	1m x 20m	10mm	Carbon Polyester/Black	185 g/m ²
